**ELECTRICAL**
24-volt AC system manages the vehicles' electronic power steering, acceleration, neutral braking and automatic speed reduction at height and during tight turns when cornering.

AC drive motor provides high torque throughout the entire drive range. The brushless design of AC technology drastically reduces maintenance and extends battery range. Lift and lower controls are single speed.

Zapi LCD dashboard display includes fault code diagnostics, hour meter, battery state of charge, travel speed and drive wheel directional indicator. The Joey comes with an emergency power disconnect, key switch and horn as standard equipment.

**MAST**
Heavy duty I-beam design provides excellent stability at height. Steel mast channels and side mounted lift cylinders increases platform capacity.

**CHASSIS**
Three point chassis design with along with 180º drive motor steering arc provides exceptional maneuverability. Powerhead mounted stability casters add additional truck stability and operator confidence at working heights of up to twenty feet.

**OPERATOR COMPARTMENT**
Ergonomic fingertip control for travel, lift, and lower functions provide the operator with logical intuitive drive characteristics while traveling at elevation or lowered.

Roomy operator compartment is designed for productivity. Large storage compartment allows storage of clip boards, pens, and miscellaneous fulfillment tools. Retractable compartment side-rails with audible alarm when raised.

**REGENERATIVE BRAKES**
Regenerative braking is applied when the operator removes their hand from travel control or when travel speeds are reduced. Electromagnetic parking brake is applied after the truck is stopped.
