

Hydraulic Flushing

Forklifts that start to run poorly, could be from the hydraulic system being clogged or damaged. Getting a hydraulic flushing would eliminate sludge, debris, and contaminated or degraded fluid from the entire hydraulic system.

We look to see if there is any Hydraulic leaks, damages, clogs and other problems. We will clean and flush the hydraulic system, clearing any fluid.

- ◆ Flush entire hydraulic system, change filter and refill with new fluid.
- ◆ Inspect for leaks, damages, and clogs
- ◆ Inspect and repair additional items as needed, per customer approval.
- ◆ Inform customer of inspection, and recommendations

\$ 395.00 *

* Up to 8 gallons of hydraulic fluid included along with filter. Exact amount of fluid needed varies by model and serial.
